Question 1

<https://github.com/pulumi/pulumi/pull/11857/commits/6da69abdeabaffcb5c6307c41fb49829cd0d6b81> fixes a <Misuse of type conversion and declaration> at <line 157-163> in <pkg/codegen/testing/tstypes/tstypes.go>.
For each tool:
This is the output of <tool 1> on the code prior to the commit:
< 📄 pulumi-09aee82c2c72b6dc4357dd7237b4279a71e485b2-tool_1.txt >

The output is effective at convincing me that <line 157-163> in <pkg/codegen/testing/tstypes/tstypes.go> is <Misuse of type conversion and declaration>
- ☐ Strongly Disagree
- ☐ 2
- ☐ 3
- ☐ 4
- ☐ Strongly Agree

Why do you believe that the output is effective or not?

The output is effective at guiding me to the fix captured in the commit
